department: Marketing

main duties: We are seeking a motivated Marketing Intern to enhance our brand visibility within student communities in Cyprus. This role is ideal for a student eager to initiate and execute impactful marketing campaigns under the guidance of our Chief Product Officer. From day 1, you will be instrumental in helping to enhance student engagement and sign-ups and broaden our reach to businesses through strategic content creation and social media engagement.

Key Responsibilities:

- Collaborate closely with the Chief Product Officer to develop and implement marketing strategies that align with our company objectives and product development goals.
- Create engaging content for social media platforms such as Instagram and TikTok to enhance brand visibility and increase student sign-ups.
- Manage daily social media activities, including posting content.
- Arrange feedback sessions with students to gather product / feature feedback to assist product development efforts.
- Assist in the production of video content that highlights the features and benefits of our products.
- Participate in brainstorming sessions for new campaign ideas and contribute to the creative process.
- Monitor and report on the effectiveness of marketing initiatives and provide insights for improvement.
- Engage with online communities and forums to promote our platform and boost our brand amongst student communities in Cyprus.

pre-requirements:

The intern should have the following requirements:

- Currently enrolled in a Bachelor's or Master's program related to Marketing, Communications, or a similar field.
- Strong familiarity with social media platforms, particularly Instagram and TikTok.
- Experience in creating and editing video content is highly desirable.
- English language (excellent communication and writing skills in English).

company: IQ3SOLAR LIMITED

sector: Renewable Energy

department: Research & Development

main duties:

The primary objective of this software developer internship is to contribute to the finalization and enhancement of the iQ3Solar platform and its associated application. The intern will be responsible for integrating monitoring and machine learning algorithms, developed in R and Python, into the existing iQ3Solar platform. Additionally, he/she will be responsible for improving the user interface, working on both the frontend and backend of the application.

Responsibilities:

1. Integration of monitoring and machine learning algorithms: Collaborate with the development team to understand the existing monitoring and machine learning algorithms developed in R and Python. Integrate these algorithms into the iQ3Solar platform, ensuring compatibility and seamless functionality. Conduct testing and debugging to identify and resolve any integration issues/errors.
2. User interface enhancement: Work closely with the design team to improve the user interface of the iQ3Solar platform. Identify areas where the user interface can be made more intuitive, visually appealing, and user-friendly. Implement the necessary frontend changes to enhance the overall user experience.
3. Frontend and Backend Development: Collaborate with the development team to understand the architecture and existing codebase of the iQ3Solar application. Contribute to the frontend development efforts by implementing new features, improving existing functionalities, and resolving any frontend-related issues. Assist in backend development tasks, such as database management, API integration, and server-side scripting. Conduct regular code reviews and participate in the debugging and testing of the application.

pre-requirements:	Knowledge of R and Python. Comfortable with PHP and JavaScript. Studying in Engineering, Computer Science, Physics or Mathematics. <u>*Available to people with a disability (PwD)*</u>
available period for the 6-week internship:	03 June 2024 until 30 September 2024
internship location:	1 Plateia Dimarchou Lellou, Agiou Demetriou, Nicosia 1016

company: IREROBOT LTD

sector: Έρευνα & Ανάπτυξη στον Τομέα Τεχνολογιών Αφής και Αππικών Διεπαφών (R&D in Haptics & Tactile Interfaces)

department: Research & Development

main duties:

Research: Conduct literature reviews on haptic technology, haptic feedback mechanisms, and existing haptic glove designs. Stay updated on the latest advancements and trends in the field.

Prototype Development: Assist in the development and testing of haptic glove prototypes. This may involve assembling hardware components, integrating sensors and actuators, and troubleshooting technical issues under the guidance of senior engineers.

Software Development: Collaborate with software engineers to develop and optimize algorithms for haptic feedback control. This could include programming microcontrollers, implementing signal processing algorithms, and designing user interfaces for configuring haptic sensations.

User Testing and Evaluation: Participate in user testing sessions to gather feedback on the performance and usability of the haptic glove prototypes. Help design experiments, collect data, and analyze results to identify areas for improvement.

Documentation: Maintain detailed documentation of the design process, including schematics, code repositories, and test results. Contribute to writing technical reports and presentations summarizing project progress and outcomes.

Collaboration: Work closely with interdisciplinary teams, including mechanical engineers, electrical engineers, and designers, to ensure seamless integration of haptic technology into the glove design. Communicate effectively and contribute ideas during team meetings and brainstorming sessions.

Learning and Skill Development: Take advantage of learning opportunities provided during the internship to deepen understanding of haptics and related fields.

Project Management: Assist in managing project timelines, tasks, and resources to ensure timely completion of deliverables. This may involve

coordinating with team members, tracking progress, and addressing any obstacles encountered during the internship.

Adaptation and Flexibility: Be prepared to adapt to evolving project requirements and priorities. Demonstrate flexibility and willingness to take on new challenges as they arise, contributing to a dynamic and collaborative work environment.

Ethical Considerations: Maintain awareness of ethical considerations related to haptic technology, such as user safety, privacy, and accessibility.

pre-requirements:

Fluent in English, Embedded Programmers and Software Engineers will be preferred.

ΜΑΡΓΑΡΙΤΑ ΝΙΚΟΛΑΟΥ

company: SKYLD SECURITY AND DEFENCE LTD

sector: R&D specialised in ICT, Security & Defence

department: European Union Research and Development projects & Administration department

main duties: As an R&D-focused company in the fields of ICT, security, and defense, Skyld Ltd's internship positions in both the R&D and administration departments would involve diverse responsibilities. Here are the main duties for interns in each department:

Data Retrieval and Analysis:

- Retrieve relevant data from open sources such as government databases, industry reports, market research firms, and academic journals.

- Conduct thorough analysis of data to identify market trends, competitive landscape, and opportunities for business growth.

- Organize and present data in a clear and concise manner for strategic decision making

Corporate Strategy Development:

- Assist in the development of corporate strategies aimed at achieving organizational goals and objectives.

- Conduct SWOT analysis to identify strengths, weaknesses, opportunities, and threats facing the organization.

- Collaborate with team members to brainstorm innovative ideas and strategic initiatives.

Action Planning:

- Contribute to the formulation of actionable plans and initiatives to implement corporate strategies.

- Develop detailed timelines, milestones, and resource requirements for each action plan.

- Monitor progress of action plans and provide regular updates to the team.

Business Planning:

- Support the creation of comprehensive business plans outlining the company's vision, mission, and strategic priorities.

- Assist in market research and analysis to inform business plan

development.

Contribute to financial projections and budgeting processes as needed.

Documentation and Reporting:

Prepare detailed documentation of corporate strategy, action plans, and business plans for review and presentation.

Compile regular progress reports and presentations for stakeholders, highlighting key findings and recommendations.

Attention to Detail:

Demonstrated attention to detail and accuracy in completing tasks, especially in administrative roles where precision is crucial.

Interpersonal and Communication Skills:

Strong interpersonal skills and the ability to work effectively in a multicultural team environment.

Excellent communication skills, including the ability to convey complex ideas clearly and concisely.

Adaptability and Willingness to Learn:

Flexibility and adaptability to work on various tasks and projects as needed.

Eagerness to learn and willingness to take on new challenges and responsibilities.

pre-requirements:

As Skyld Ltd, a company engaged in R&D EU-funded projects in ICT, security, and defence, offering internships to students in both R&D and administration departments requires candidates to meet certain minimum requirements to ensure they can contribute effectively to the projects. Here are the minimum requirements for potential interns:

Currently enrolled in a bachelor's or master's degree program in Business Administration, Management, Marketing, Finance, Economics, or related field preferably at Master's Level.

Strong analytical skills with the ability to gather, interpret, and present data effectively.

Excellent written and verbal communication skills in English.

Proficiency in Microsoft Office suite, particularly Excel and PowerPoint. Especially Excel

Ability to work independently and collaboratively in a fast-paced environment.

Prior experience with corporate strategy development or business planning is a plus.
